Acknowledgement

We express our sincere gratitude to everyone who supported and guided us throughout the development of FOODDASH.

First, we thank our Project Guide / Faculty Mentor for their invaluable guidance, constructive feedback, and continuous encouragement throughout every phase of this project — from ideation to final testing.

We are grateful to our Head of Department and the faculty members of our department for providing us with the resources, infrastructure, and academic environment that made this project possible.

We thank the Firebase and Android(Flutter) developer communities whose extensive documentation, open-source libraries, and community forums were essential learning resources throughout the development process.

We express gratitude to our classmates and peers who participated in user testing, provided honest feedback on the UI, and helped us identify and resolve bugs during the testing phase.

Finally, we thank our families for their patience and encouragement during the long hours of development, debugging, and documentation that this project required.

This project was developed as part of the Bachelor of Technology / Bachelor of Computer Applications program and represents the combined effort, learning, and dedication of both developers over the course of one semester.
